# Second Visual

Here is the second visual. Use it to answer the following quiz question.

What does this plot do well?

- ☒ High data-ink ratio.
- ☒ No chart junk.
- ☒ Highlights where the remote is most likely hiding in a way that stands out.
- ☒ Highlights the answer to the question of "Is your remote gone forever?"

QUESTION 1 OF 2

Which of the statements are true? (Select all that apply)

In bar charts, you should always arrange the position of bars based on the value on the y-axis, from highest value to lowest value.

You should not use many colors if it increases chart junk and decreases the data-ink ratio

You should always include units or measurements when you add axis labels to the audience understand the scale of the data.

You don't need to provide legends for non-positional variables as long as you used different colors.
